IMPORTANT NOTE! BLOOD TESTS MUST BE TAKEN BEFORE SEMEN COLLECTION.
 PLEASE LET RECEPTION KNOW IF YOU REQUIRE A BLOOD TEST BEFORE YOU COLLECT.

INSTRUCTION FOR COLLECTING SEMEN

AT THE LABORATORY

Introduce yourself at reception.
 For diagnostic Semen Analysis or a Trial Wash you must have your doctors request form or we cannot accept the specimen for analysis.
 You are required to pay at the time but can claim a proportion of the fee from medicare.

DO NOT

- Ejaculate (via intercourse or masturbation) for three (3) days prior to analysis.
- Pass urine for 30 minutes before collecting.
- Collect by withdrawal intercourse (coitus interruptus).
- Use lubricants or contraceptive sheaths (condoms) as they kill sperm.
- Refrigerate or let your sample become hotter than body temperature

DO

- Wash your hands and penis before collecting.
- Use only a sterile specimen container provided by NGF, your doctor or purchase a 60 ml yellow topped sterile container from a Pharmacy.
- Collect the sample by masturbation ONLY, if this is a problem please contact NGF and speak with a scientist on a possible alternative.
- Collect the ENTIRE sample, especially the first few drops.
- We recommend you COLLECT at home where conditions are more favourable (the sample should get to our laboratory within one (1) hour and be kept at body temperature after collection).
- Note whether the sample was thick at time of collection.
- Ensure the lid of the container is screwed on firmly.
- Label the jar with your name, the time and date of collection.
- You (or your partner) can deliver it to the lab.

For appointments please call (02) 9890 9022 or **1300 300 643** Fax: 02 9890 8755
